bamboo campaign daybed and shelves set

Sold

REF: 1496

Description

An early 20th century bamboo campaign daybed and shelves. The shelves separate into 2 so can be stacked or used as a pair.

The daybed although structurally sound would possibly be more suited as console table perhaps.

The bed has had worm at some point but doesn't affect its structure.

The construction method gives the impression that they should break down so there is movement in them.
